## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 22-38 are rejected under the judicially created doctrine of double patenting over claims 1-21 of U. S. Patent No. 6,634,935 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is anticipated by claims 1-21 of U. S. Patent No. 6,634,935, because it is inherent that in the step of "causing the bi-directional linear movement of the portion of the polishing pad within the processing area with the bi-directional linear movement of the slide member", the slide contacts a backside of the polishing pad, otherwise, no movement of the pad would occur from the movement of the slide.

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Krusell et al., Osawa et al., and Talieh et al. each disclose a
